

2008

**ANNUAL WATER QUALITY REPORT (CCR)  
SKY MEADOWS RANCH WATER ASSOCIATION  
System ID# 80005U**

This report is designed to inform you about the quality water and services we deliver to you every day. While it is easy to take our water for granted, providing safe drinking water is a very complex business, and day after day, year after year, Sky Meadows Ranch is able to report that we meet and exceed all Federal and State standards for the drinking water provided to you. Each year, Sky Meadows Ranch prepares this Water Quality Report to keep you informed about the water and services we have delivered over the past year. Our goal in providing this information is to help you understand what is in your water- and what isn't.

**WATER SOURCE** Our water source is from six deep ground water wells. The only treatment we are required to perform is chlorination as we pump to our storage tanks.

**SYSTEM IMPROVEMENTS** Improvements to our system this year meant finally replacing the wood stave storage tank with a new poly plastic tank. This tank will be much easier to keep sanitary and secure.

**CONTACTS** If you want to learn more, please attend the board meeting in July. Please remember your Board Of Trustees here at Sky Meadows Ranch is comprised of unpaid volunteer property owners that serve multiple year terms and are elected at the annual meeting by you the membership. The system manager is also a property owner licensed by the State Health Department and has been certified by passing State Examinations. Your contacts are:

Colin Ferrin, Board Chairman  
1571 Skull Springs Road

**DRINKING WATER CONTAMINANTS** Sky Meadows Ranch routinely monitors for contaminants in your drinking water according to Federal and State requirements. The following is a summary of the results of our monitoring efforts for the calendar year of 2008. We are classified as a Group Type A, Community system.

**INORGANIC CHEMICAL (IOC) TESTING** not required in 2008.

**NITRATES TESTING** Tested for in August 2008 and found to be less than 0.5 mg/liter, ruled insignificant and essentially no presence of nitrates found.

**LEAD AND AND COPPER TESTING** not required in 2008.

**TOTAL TRIHALOMETHANES(TTHMs) and HALOCETIC ACID** not required in 2008

**BACTERIOLOGICAL MONITORING** Our schedule for 2008 was for monthly sample testing. Our water system performs scheduled bacteriological monitoring to test for the presence of coliform bacteria, fecal coliform and e.coli. Bacteriological monitoring results found to be safe with no contamination present.

We must continue to use our water efficiently. Your Water Association has now installed water meters on all connections. Always turn off your water at your meter when leaving for any length of time. Repair any leaks however small, don't allow toilet valves to run. Lot owners are responsible for all water that goes through the meter. Be sure to inform all your guests and children of the importance of protection and preserving our precious water source.

Thanks and Have Fun at Sky Meadows

Gary McFadden, #010977 WDM1/WTPO2 system manager
